

**FOR IMMEDIATE RELEASE**

## **Array Networks Positioned in the Visionaries Quadrant for SSL VPN Magic Quadrant 3Q2008 Report**

*Evaluation based on innovation and feature-rich security product line*

**MILPITAS, CA – December 16, 2008** – [Array Networks Inc.](#), a leading provider of optimized and secure universal access solutions, today announced it has been positioned in the visionaries quadrant of the Gartner North American SSL VPN Magic Quadrant<sup>1</sup> report for 3Q2008.

According to Gartner, “Visionaries invest in the leading-edge or “bleeding edge” features that will be significant in next generation products and will give buyers early access to improved security and management. Visionaries can affect the course of technological developments in the market, but they lack the execution influence to outmaneuver challengers and leaders. Clients pick visionaries for best-of breed features, and, in the case of small vendors, may obtain more personal attention.”

“Array’s position in Gartner’s “visionaries” quadrant reflects our ability to provide innovative, scalable enterprise solutions,” said Michael Zhao, president and CEO of Array Networks. “Our new [WiFiProtect](#) and [DesktopDirect](#) remote access products reflect our vision of universal access solutions that enable enterprises to securely access essential applications on environmentally-friendly SSL VPN platforms.”

The Magic Quadrant considers which vendors will likely dominate sales and influence technology directions through 2008, as well as which vendors are most visible among clients, generate the greatest number of requests for information and contract review, and account for the most new and ongoing installations in Gartner's client base. Gartner ranks vendors in the Magic Quadrant based on performance for calendar year 2007 through the end of September 2008.

### **About the Magic Quadrant**

The Magic Quadrant is copyrighted December 2008 by Gartner, Inc. and is reused with permission. The Magic Quadrant is a graphical representation of a marketplace at and for a specific time period. It depicts Gartner's analysis of how certain vendors measure against criteria for that marketplace, as defined by Gartner. Gartner does not endorse any vendor, product or service depicted in the Magic Quadrant, and does not advise technology users to select only those vendors placed in the "Leaders" quadrant. The Magic Quadrant is intended solely as a research tool, and is not meant to be a specific guide to action. Gartner disclaims all warranties, express or implied, with respect to this research, including any warranties of merchantability or fitness for a particular purpose.

**About Array Networks**

Founded in 2000, Array Networks is a global leader in enterprise secure application delivery and universal access solutions for rapidly growing SSL VPN and application acceleration markets.
